Enterprise for Processing Uranium Ore, Nejdek

1.

The enterprise for the processing of uranium ore is established in a former paper mill, which now houses large laboratories. The plant employs civilian employees (for the most part true to the regime), Communists, and about 100 prisoners who are brought daily by bus from Jachymov. Most of the engineers are Soviets. The civilian employees are thoroughly checked prior to their employment by the enterprise, and are bound by oath to reveal nothing of what goes on inside the plant. The plant operates on a three shift system, and is guarded by members of the National Security Corps. Entrance to the plant is contingent upon presentation of a special permit, issued by the Management of the Jachymov Uranium Mines. Uranium ore is brought to this plant from Jachymov, by truck.

Nejdek Wool Combing Factory (Nejdecke Cesarny Vlny)

3.

This enterprise is reported to be the largest factory for the processing of wool in Czechoslovakia. It employs about 2,000 workers. It operates on a three shift system.
